

# Pizza Hut Restaurant site specific questionnaire

The following questionnaire will be used to manufacture custom lightboxes for your restaurant front. Please complete all requested information. All measurements must be accurate to ensure proper sizing of lightbox fixtures. Please use the examples in the key below to illustrate doors, pillars etc. PLEASE NOTE: Pillars or columns or other obstacles outside the window DO NOT NEED to be illustrated. All dimensions need to be stated in inches ONLY (to the nearest 1/16 of an inch). Please measure restaurant front from wall to wall and ceiling to floor inside the restaurant. After determining all measurements please illustrate how you envision the placement of the lightboxes. PLEASE NOTE: The standard box size is 49" wide. 37" and 25" wide boxes are also available with the limitation of a maximum of 2 per store. These boxes must be positioned one at each end of the store. If only one 37" or 25" is needed it can be placed at either end. An 8' cord and plug will be provided on the 1st box. The 1st box is always considered the left most box from inside the store.

### Restaurant Information

Restaurant # \_\_\_\_\_  
Address \_\_\_\_\_  
Phone \_\_\_\_\_

### Contractor Information

Contractor's name \_\_\_\_\_  
Company \_\_\_\_\_  
Address \_\_\_\_\_
