

AERIAL

Cantina Laredo, Virginia Beach

Now in its 15th year, the AERIAL family of products is a testament to Creative Palette's continuing drive to deliver cost effective alternative architectural solutions which are easy to install, require less maintenance, and offer a lower cost of ownership.

What Is AERIAL...

Creative Palette's AERIAL line is a cost effective solution to traditional constructed overhead installations. Bulk heads to beams, curvy or straight. Any size and color or woodgrain. Fabricated from class A fire rated PVC and foam, our AERIAL products are lightweight, easy to install and transform a space creating maximum impact.

Why Use AERIAL...

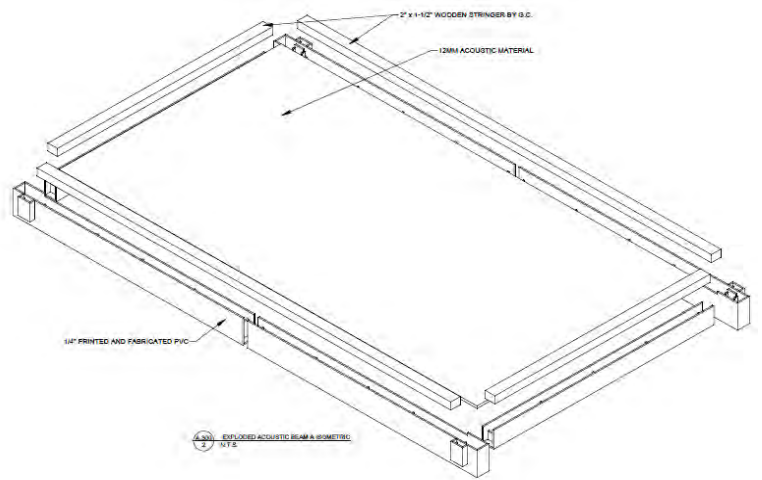

- Nearly unlimited finish options - match PMS, HPL.
- Fast and quick installation.
- No increase of overhead structure to support - perfect for remodels.
- Using Creative Palette's aerial creates a lower total cost of ownership through less shipping, easier installation and low maintenance.
- Made in the USA

Specifics Of AERIAL...

- Manufactured with all fire rated Class A (UL E-84) materials.
- Ultra light weight - easily hangs with aircraft cable in most applications.
- Dimensionally stable - Will never split or warp.
- Directly printed to material surface - no de-lamination.
- Easy slip fit design.
- Custom manufactured to your design
